Maintenance Package includes following services:

- Priority service, shorter Turn Around (1-2 Business Days)
- Update, correct or create new HTML web pages as requested
- Image scanning, optimization and adding images to web sites
- Verify all links
- Does not include layout changes, Flash animation, PHP, etc.

Website updates consist of: Addition, Subtraction, and Editing of all text, images, videos, audio, multimedia and other types of content on an existing website. Addition includes creating and linking to a menu, a new page with new content. Subtraction includes removing any pages, and their menu links from your website, whether to be used again at a later date, or permanently removed. Editing consists of changing existing text on any page, and updating all menu items and or links for that page.

Banked Hours

Almost every business has a busy time and a slower time. You might need more edits and changes done on your site some months (for special events, marketing, etc.) than others. We will bank any unused hours from your maintenance package into the next month up to 3 months.

Our website specialists are very good at what they do and can get a lot of your updates completed in a short amount of time. Therefore, it is best to speak with us before choosing a package, we can review your website, and your past updates and tell you which package will best suit your needs.

Don't Need Frequent Updates? Pay as you need to.

\$90/hr

Typically, 0.5 hr is enough time to add up to five photos and a few paragraphs of text.
